# 自己紹介： 桑田 斉（くわた ひとし）

## • 所属

- APRESIA Systems 株式会社

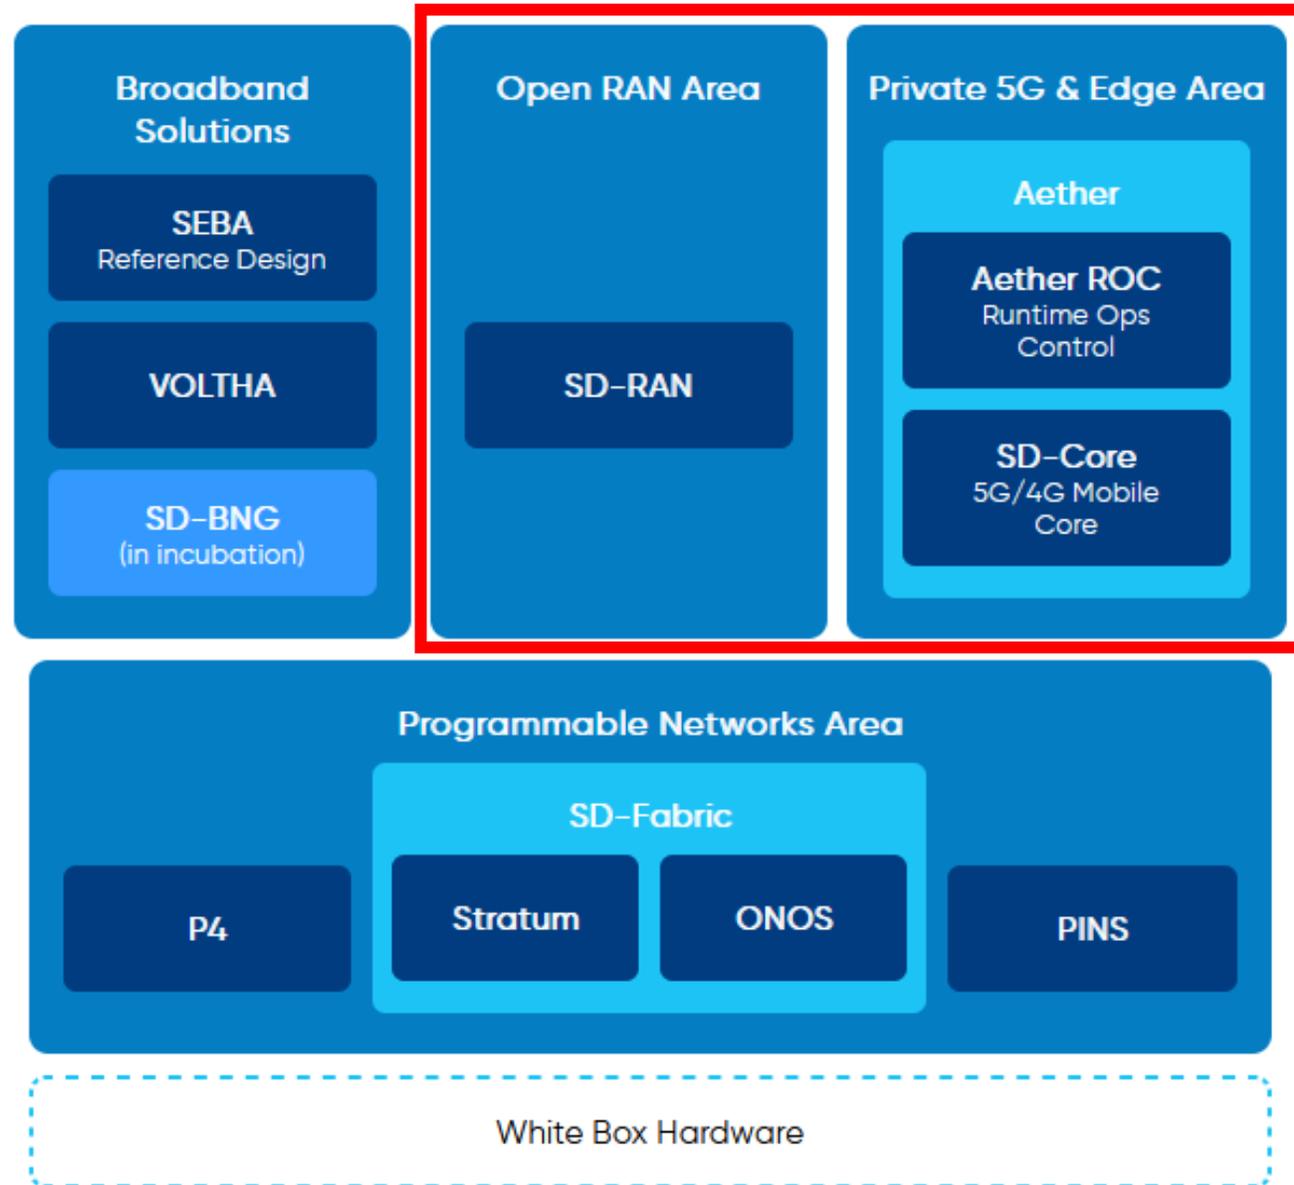

## • 経歴

- 組み込みソフトウェア開発（社会人最初の10年くらいは、こちらに専念）
  - 通信事業者向け、エンブラ向けの自社製イーサネットスイッチ
- 最近では、イーサネットスイッチに関するソフトウェア技術全般
  - 過去にOpenFlowやONOSを経験（その経緯もあって、ONFに参加したこともあり）
  - 最近では、ホワイトボックススイッチやSONiC、P4を中心に活動
    - <https://www.janog.gr.jp/meeting/janog49/sonic/>
    - <https://www.youtube.com/watch?v=Db7k-ZguB64>
- Local 5Gは素人
  - 勉強も兼ねて、ONFの5Gソフトウェアを動かしてみた話を本日は共有

# 今回お話する対象

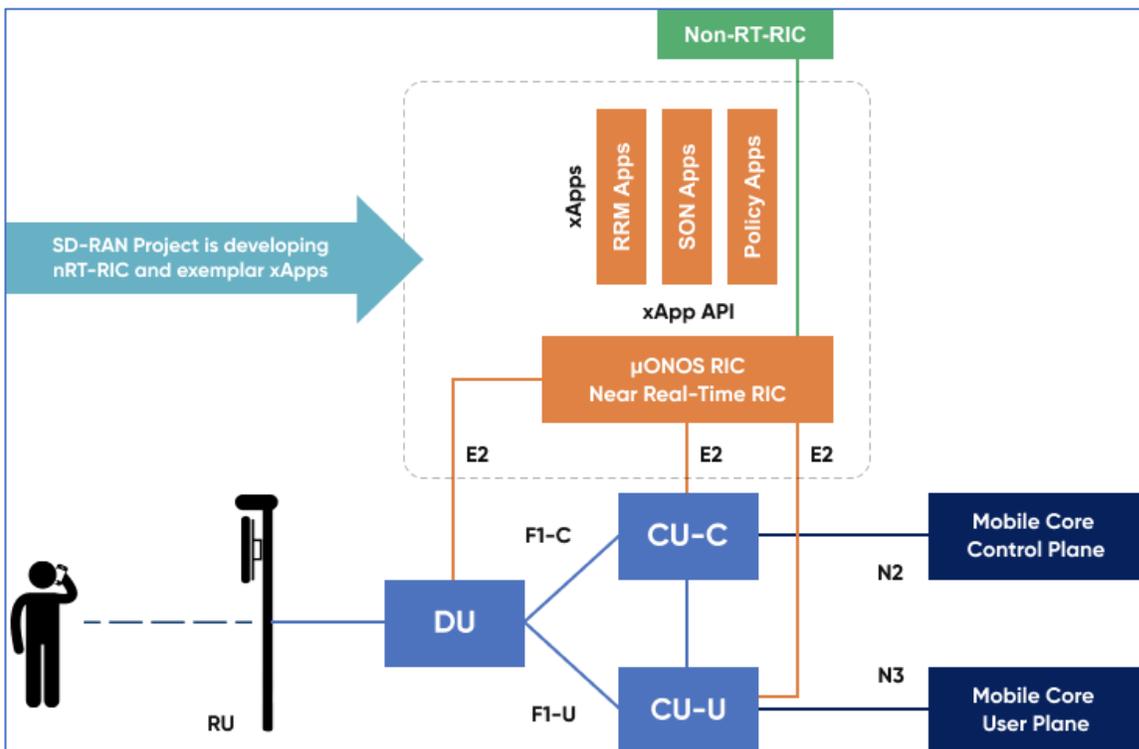

- ONFが開発している5Gのソフトウェアのテスト環境を作ること
    - Aether
    - SD-RAN
- ※ ONF: Open Networking Foundation

## ONF Areas & Projects

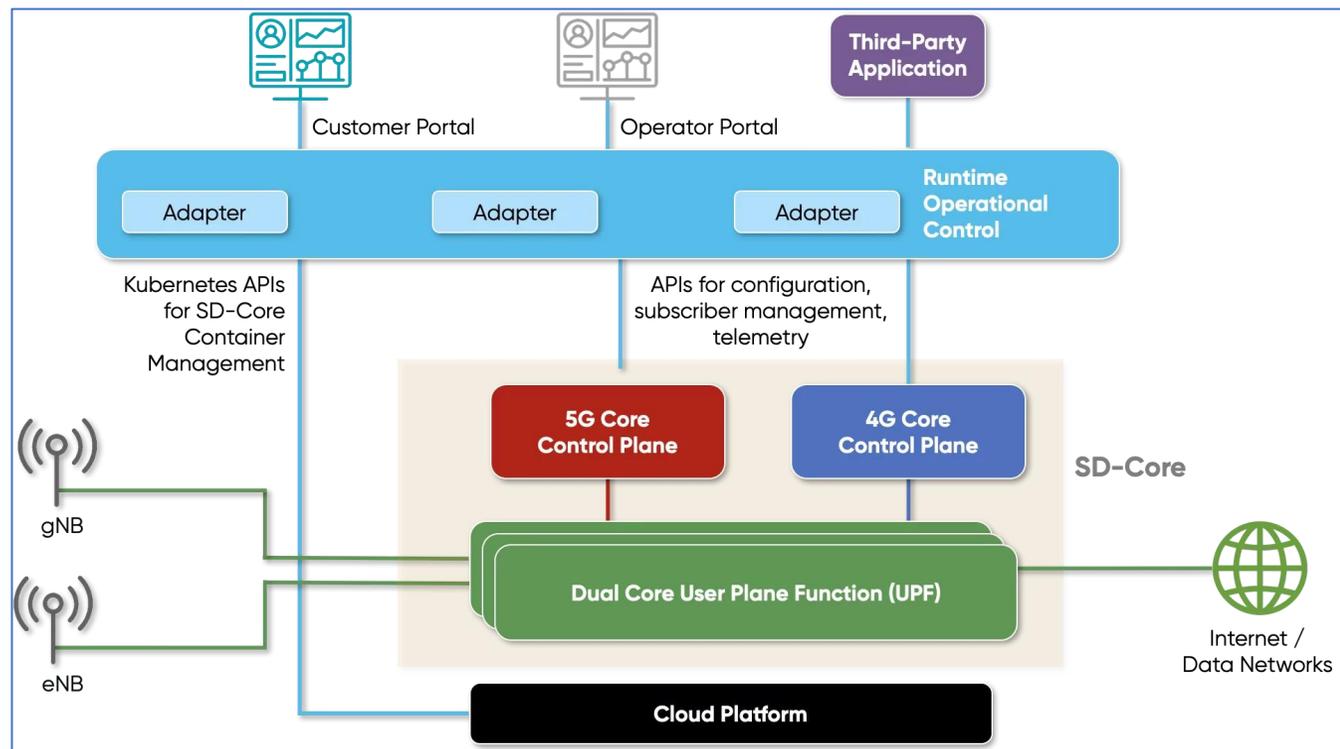

# AetherとSD-RANのソフトウェア開発対象

- Aether: 4G/5GコントロールプレーンとUPF、上位のコントローラが対象
- SD-RAN: Open RANの特にRIC (RAN Intelligent Controller)が対象
  - 商用環境ではデータプレーンはハードウェアにて実現することを想定

<https://opennetworking.org/open-ran/>

<https://opennetworking.org/sd-core/>

# AetherとSD-RANのOSS化

- 2022/2/22

- ONF's Leading Private 5G Connected Edge Platform Aether™ Now Released to Open Source

- <https://opennetworking.org/news-and-events/press-releases/onfs-leading-private-5g-connected-edge-platform-aether-now-released-to-open-source/>

- ONF's SD-RAN™ Now Fully Released to Open Source

- <https://opennetworking.org/news-and-events/press-releases/onfs-sd-ran-now-fully-released-to-open-source/>

## Aether Documentation

Aether is an ONF's 5G/LTE Connected Edge Platform-as-a-Service. More information about Aether can be found at the [ONF website](#).

### Getting Started with Aether

Here are some useful places to start with Aether:

- Setup an Aether software development environment with [Aether-in-a-Box](#).
- For a PoC deployment, bring up an [Aether-in-a-Box on 4G Real Radios](#).
- For a PoC deployment, bring up an [Aether-in-a-Box on 5G Real Radios](#).
- Learn about how to [configure Aether using the ROC](#).
- Learn the requirements of hosting an [Aether Connected Edge](#).
- Read the most recent [Release Notes](#).

### Aether Architecture and Components

Aether uses components from several ONF projects. More information can be found at these sites:

- SD-Core
  - [SD-Core Website](#)
  - [SD-Core Documentation](#)
- SD-Fabric
  - [SD-Fabric Website](#)
  - [SD-Fabric Documentation](#)
- SD-RAN
  - [SD-RAN Website](#)
  - [SD-RAN Documentation](#)

**SD-RAN**  
1.4.3

Search docs

**OVERVIEW**

- Introduction
- Architecture

**INSTALLATION**

- sdRan-in-a-Box
- Hardware Installation
- Other Installations

**COMPONENTS**

- onos-api
- onos-ric-sdk-go
- Kubernetes Operator for μONOS
- onos-e2t
- onos-a1t
- onos-e2-sm
- onos-kpimon
- onos-pci
- onos-config
- onos-topo

# XXXX-in-a-Box

- 一つの仮想マシンの中で閉じて、ツールをお試しできる環境
- 今回試した環境
  - Aether-in-a-Box for Developers
    - <https://docs.aetherproject.org/master/developer/aiab.html>
  - Installation with RAN-Simulator and Facebook-AirHop xAPP
    - [https://docs.sd-ran.org/master/sdran-in-a-box/docs/Installation\\_RANSim\\_FBAH.html](https://docs.sd-ran.org/master/sdran-in-a-box/docs/Installation_RANSim_FBAH.html)

# Aether-in-a-Box

仮想化環境で動かす範囲

# Aether-in-a-Box for Developersのインストール

## • 要求されている条件

- Ubuntu 18.04
- Kernel 4.15 or later
- Haswell CPU or newer
- At least 4 CPUs and 12GB RAM

## • 準備した仮想マシン

- Ubuntu 18.04 server
- Kernel 4.15.0-192-generic
- CPU 16コア
- メモリ 32GB
- ストレージ 80GB

## • 事前準備

- パスワード無しのsudo実行
- sudo apt install make

## • Clone 5G AIAB (aether-in-a-box)

- git clone "https://gerrit.opencord.org/aether-in-a-box"
- cd ~/aether-in-a-box

## • 5G ROCを有効にして環境構築(20-30分)

- CHARTS=release-2.0 make roc-5g-models

## • テスト環境を起動

- CHARTS=release-2.0 make 5g-test

## • あと片づけ

- make reset-test
- make roc-clean

# GUI確認

- <http://<仮想マシンのIPアドレス>:31194>

The screenshot displays the AETHER dashboard interface. At the top left is the AETHER logo. The main header is labeled 'DASHBOARD'. The interface is divided into two main sections: 'Slice (1)' and 'Site (2)'. The 'Slice (1)' section contains a table with columns for 'Active', 'Inactive', and 'Idle'. One entry, 'AiaB Slice (aiab-vcs)', is shown with a red error icon. The 'Alerts' section is currently empty. The 'Site (2)' section contains a table with columns for 'Monitoring Agents (up/total)' and 'Cluster Nodes (up/total)'. Two entries are listed: 'AiaB site (aiab-site)' and 'Global Default Site (defaulttent-defaultsite)', both with red error icons. Navigation controls for items per page and page numbers are visible at the bottom of each table.

**AETHER**

DASHBOARD

**Slice (1)**

Active	Inactive	Idle
		

AiaB Slice (aiab-vcs)

Items per page: 4 1 - 1 of 1 < >

**Alerts**

Alert	Summary	ID
-------	---------	----

**Site (2)**

Monitoring Agents (up/total)	Cluster Nodes (up/total)
AiaB site (aiab-site)	AiaB test site 
Global Default Site (defaulttent-defaultsite)	Global Default Site 

Items per page: 4 1 - 2 of 2 < >

$ sudo docker exec -ti k8s_onos-cli_onos-cli-6b746874c8-bv7gs_riab_ee4cd779-8768-4653-a4e7-f9f868924326_0 bash
onos-cli-6b746874c8-bv7gs:~$
onos-cli-6b746874c8-bv7gs:~$ onos
ONOS command line client

Usage:
  onos [command]

Available Commands:
  alt          ONOS alt subsystem commands
  completion   Generated bash or zsh auto-completion script
  config       ONOS configuration subsystem commands
  e2t          ONOS e2t subsystem commands
  help         Help about any command
  kpimon       ONOS KPIMON subsystem commands
  mho          ONOS MHO subsystem commands
  mlb          ONOS MLB subsystem commands
  pci          ONOS PCI subsystem commands
  perf         simple gRPC performance measurement client
  ransim       ONOS RAN simulator commands
  rsm          ONOS RSM subsystem commands
  topo         ONOS topology resource commands
(省略)
```

# onos-cliで中の動きを確認

```
$ onos ransim get
Commands for retrieving RAN simulator model and other information
```

Usage:

```
onos ransim get [command]
```

Available Commands:

```
cell      Get a cell
cells     Get all cells
layout    Get Layout
metric    Get metric value
metrics   Get all metrics of an entity
node      Get an E2 node
nodes     Get all E2 nodes
plmnid    Get the PLMNID
route     Get a UE route
routes    Get all UE routes
ue        Get UE
ueCount   Get UE count
ues       Get UEs
```

Flags:

```
-h, --help  help for geta command.
```

(省略)

```
$ onos ransim get ues
